

Research Tips, Finding & Using Data

AKA, How do we do what we do?

“OK Policy believes that Oklahoma can be a great state, one that ensures prosperity for all our citizens through good schools, good jobs, good health and strong communities. To make the best policy decisions that lead us to this better future, policymakers and citizens need good, factual information. We provide the facts and advocate for fair and responsible public policies.”

“The ideas of economists and political philosophers, both when they are right and when they are wrong, are more powerful than is commonly understood. Indeed, the world is ruled by little else. Practical men, who believe themselves to be quite exempt from any intellectual influences, are usually slaves of some defunct economist.”

— John Maynard Keynes
